**Objective** Seeking opportunities as a graphic designer / illustrator.

**Summary of Qualifications** With a lifetime devoted to art and nearly a decade of experience in graphic design, I've spent the last five years working professionally. I am proficient at working in vector, raster, and traditional mediums; capable of illustrating all manner of subject matter in a variety of styles. I am also experienced in marketing and design projects; capable of seeing them through from concept to completion. I know my way around a camera, I'm a competent writer, and I have moderate experience in web and multimedia. I also possess a rudimentary knowledge in writing code as well as working with 3-D models, technical drawings, and digital video. I am detail oriented, thorough, and motivated to make even the most routine and commonplace projects stand apart.

**Accomplishments** Designed a site for Ivy Tech Community College's "Art Jam" competition to increase organization and make information more accessible to all while cutting costs on previous methods. Overall participation in Art Jam tripled following the site's launch.
